

99s: Women Pilots of Eastern New England

New England Section Profile Project

Hello from the ENE Vice Chair!

The New England Section is kicking off the all new **Profile Project**, and **we want to hear from you!**

The Section has reached out to us and asked that we provide three profiles initially and more in the coming months. The project involves members volunteering to interview one or more other members from our Chapter and filling in the template attached. A photo of the member being interviewed is also requested, hopefully of our subject lady with an airplane. The idea is not to tell everything about a person - we all have long and interesting stories - but rather to get a snapshot of the person so we can begin to know her. It is suggested that the whole profile should be kept to 700-1000 words.

It should be fun and a great way to get to know a fellow 99. A phone interview will do (or what a great reason to get together in person), and the form can be typed as the interview is conducted. We would also like a photo for each profile. If it is difficult to include in the template just send the photo separately along with the text of the interview to Jann and she will insert it into the profile. jannclark99@yahoo.com

- The lady being interviewed should have a chance to review what was written, correct or edit as she feels is best and then send the form back to the interviewer.

- We would like to target a new member, a long-time member and perhaps an officer or scholarship winner.
- This is a great opportunity to include our members in Vermont and New Hampshire that we don't get to see often.
- We would like to have the interviews conducted and edited in March and published in April before our Spring Section Meeting.
- If you are willing to do a profile in March, please respond to enevicechair@gmail.com so we can get started on the project. If you are not able to do an interview now, please consider volunteering now and completing the interview for a future month. The idea is to profile ALL of our members eventually.

This sounds like it will be a really fun project for everyone. I am looking forward to both doing some interviews and reading about my fellow New England 99's.

Blue Skies!

Beth Young
